Your hearing • Our passion

Turn Your Priorities into Reality

Do you wish to hear and understand with confidence even in tough hearing environments? We at Bernafon do our best to satisfy your wishes and deliver even more than you expect.

Juna is Bernafon's most sophisticated hearing aid family featuring the Audio Efficiency™ core technology. No matter which environment you are in, Audio Efficiency™ technology orchestrates the right set of features and accessories for you.

Speech

Audio Efficiency™ provides premium sound quality and speech understanding in demanding listening environments.

Comfort

Audio Efficiency™ incorporates an advanced set of features to create a comfortable and less tiring hearing experience.

Individualization

Audio Efficiency™ offers various listening programs and connectivity accessories supporting your individual lifestyle.

Turn Random Sounds into Meaningful Words

With Juna premium hearing aids, you can enjoy enhanced speech understanding even in the most challenging listening situations.

ChannelFree™, our proven signal processing system, provides you with a distinctively clear and natural sound quality.

i-VC, an intelligent volume control, is a new and unique feature in Juna ensuring that your hearing aid reacts most appropriately to volume changes and adapts to different listening environments.

Directionality is also important for hearing conversations more clearly. That's why Juna comes with a set of different **directionality features** to support 360° sound detection.

Finally, noise reduction is crucial for hearing the conversation and enjoying the moment. With Juna and its set of **noise reduction systems**, unwanted noise is cleverly reduced.

Turn Challenging Situations into Success Stories

For even greater success in challenging listening situations, Bernafon offers various connectivity accessories.

SoundGate 3 gives you the freedom to listen with your hearing aids to a number of wired and wireless audio sources. It is designed to be discreet, comfortable to handle, and easy to use.

SoundGate Mic is a small microphone that can be worn by the person you are speaking with. Coupled with the SoundGate 3, the speech signal is transferred directly to your hearing aids.

The **RC-N** remote control makes changing volume or program settings easy, particularly if you find it difficult to do on the hearing aid itself.

Read our SoundGate flyer to learn more about the different options for being connected with Bernafon devices. You can also ask your hearing care professional or visit the Bernafon website for further information.

Turn a Great Choice into Something Just Right for You

Juna is available in various behind-the-ear (BTE) and in-the-ear (ITE) hearing aid models with numerous color options. This large range allows you and your hearing care professional to choose just the right hearing aid for you.
